Maps API - Series Data

Description

This request returns a cross section of regional data for a specified release date. If no date is specified, the most recent data available are returned.

Parameters

- api_key
- file_type
- series_id
- date
- start_date

Examples

This request can return either XML or JSON by setting the file_type parameter to xml or json. Note that the default value of file_type is xml. The API key 'abcdefghijklmnopqrstuvwxyz123456' is for demonstration purposes only. Use a registered API key instead.

XML

Request (HTTPS GET)

```
https://api.stlouisfed.org/geofred/series/data?series_id=WIPCPI&api_key=abcdefghijklmnopqrstuvw
```

Response

```
<?xml version="1.0" encoding="utf-8" ?>

    }
```

Parameters

api_key

Read API Keys for more information.

- 32 character alpha-numeric lowercase string, required

file_type

A key or file extension that indicates the type of file to send.

- One of the following values: 'xml', 'json'
  xml = Extensible Markup Language. The HTTP Content-Type is text/xml (xml is not available for county data).
  json = JavaScript Object Notation. The HTTP Content-Type is application/json.

series_id

The FRED series_id you want to request maps data for. Not all series that are in FRED have geographical data.

- string, required

date

The date you want to request series group data from.

- YYYY-MM-DD formatted string, optional

start_date

The start date you want to request series group data from. This allows you to pull a range of data

- YYYY-MM-DD formatted string, optional
